## Directive REACH 1907/2006

Dear Customer

We herewith confirm that we continually check our products and their packaging in accordance with the REACH regulation 1907/2006 and the latest SVHC list.

Our products do not contain (with the following exceptions) any substances listed in the above mentioned regulation in concentrations that are limited by the regulation, or which are subject to declaration.

The only exceptions are batteries in some of our products, which according to the battery manufacturer's information contain the unfortunately indispensable substance EGDME (1.2-dimethoxyethane) and some metal components and electronic components that may contain > 0,1 % of lead. According to REACH regulation 1907/2006, these substances are subject to declaration.

These substances do not pose any risk to your health and the environment if our products are properly used.

The use of these substances is in accordance with the applicable statutory regulations.

Please contact us if you require further information.

Yours faithfully,  
Theben AG
