Aesthetic, intelligent, unique  
Lighting at its  
most beautiful

## Intelligent lighting theLeda P LED spotlights

Automatic lighting has never been so intelligent. And so beautiful. With its **unique** shape, harmonic lines and high quality surfaces, the new LED spotlight theLeda P from Theben represents a new chapter in automatic lighting control. The special design of the LED panels also emits light to the sides, additionally illuminating the wall on which the theLeda P is installed. This aura effect **makes** its bright light appear much friendlier and softer. Glare-free, **radiant** light instead of a piercing light beam.

The LED **spotlights** not **only** feature an elegant exterior and a special light output, but also powerful functions such as an orientation light, protection rating IP55, a dimming function and the intelligent parallel connection.

### Versatile

theLeda P is available with or without motion sensor. With one or two light panels. In white or aluminium colour. Versatility can be this beautiful.

# theLeda P – elegant, powerful, unique LED spotlight with and without motion detector

## Easier to use and install Safer and more convenient to use

### Functions of all theLeda P LED spotlights

-  Easy adjustment
-  Suitable for flush-mounted boxes
