## Basic advice

### WARNING

**Danger of death through electric shock or fire!**

➤ Installation should only be carried out by professional electrician!

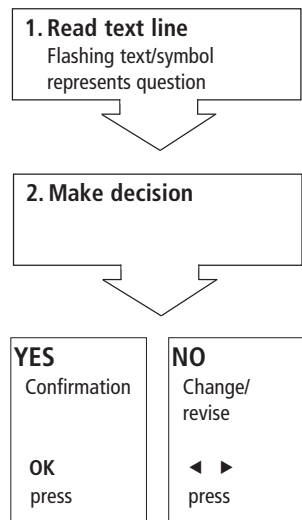

GB

- The device is designed for installation on DIN top hat rails (in accordance with EN 60715)
- Corresponds to type 1 STU in accordance with IEC/EN 60730-2-7, designed for use in normal environment
- Power reserve (10 years) is reduced with memory card inserted (in battery mode)
- **Designated use:**  
The time switch is used to control tasks in small load applications  
For use only in closed, dry rooms  
Suitable for switching SELV (Safety Extra-Low Voltage) devices
- **Disposal**  
Dispose of equipment in an environmentally-friendly manner

## Screen display and keys

## Operating principle

## Menu overview

## Connection/installation

### WARNING

#### Warning, danger of death through electric shock!

- Must be installed by professional electrician!
- Disconnect power source.
- Cover or shield any adjacent live components.
- Ensure device cannot be switched on!
- Check power supply is disconnected!
- Earth and bypass!

### Connect cable

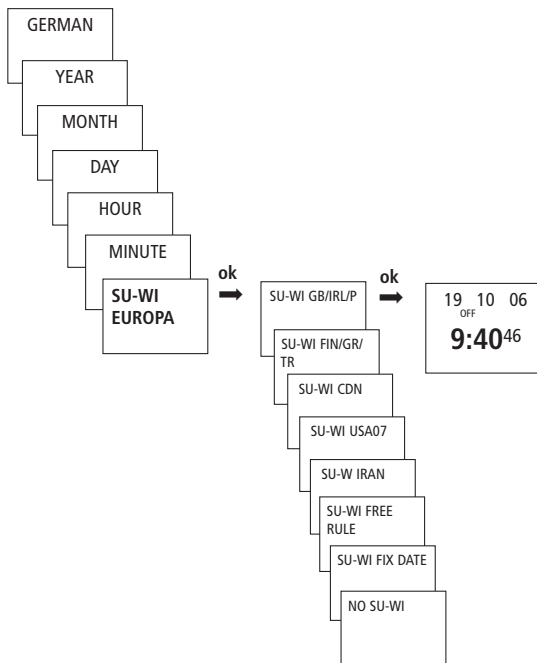

- Strip cable by 8 mm (max. 9).
- Insert cable at 45° in the open terminal (2 cables per terminal is possible).
- Only for flexible wiring: Press screwdriver downwards to open spring screwless terminal.

## Initial start-up (see fig.)

### Set date, time and summer-/winter time rule

- Press desired button and follow on-screen instructions.

## Reprogram switching time (see fig.)

- Press **MENU**.
- Confirm with **OK** or select desired setting ◀ ▶.
- Reconfirm with **OK**.

You have 56 memory locations available.

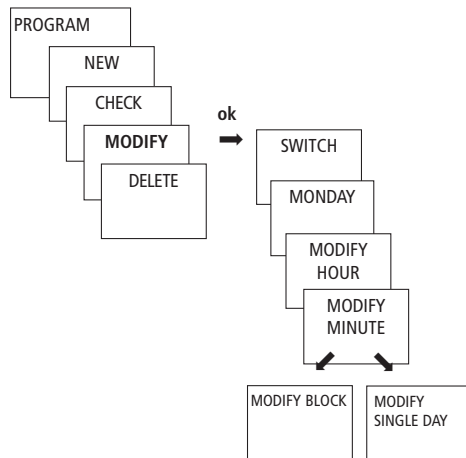

## Change/delete switching time (see fig.)

- Press **MENU**.
- Confirm with **OK** or select desired setting ◀ ▶.
- Reconfirm with **OK**.

You can either change or delete a block, i.e. a switching time copied for several days (e.g. Mon-Fri) or a single switching time.

GB

## Manual and permanent switching

Manual and permanent switching can be selected by using menu option **MANUAL** or (in the automatic display) via a combination of buttons (see fig.).

### Activate manual switching

- Quickly press both buttons simultaneously.

### Activate permanent switching

- Press both buttons simultaneously for 2 seconds.

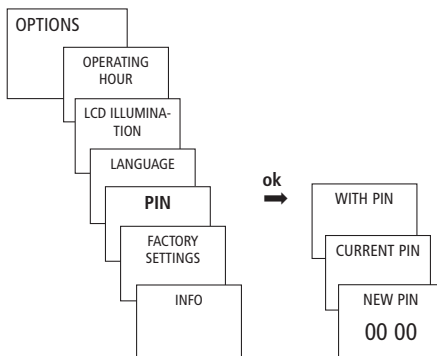

### Cancelling manual/permanent switching

- Press both buttons simultaneously.

## PIN code

The **PIN code** is set in the menu under **OPTIONS** (see fig.).

If you have lost the PIN call the Theben Hotline.

## Memory card OBELISK top2

### Use memory card

- Insert memory card in the time switch.
- Request saved switch timings, read to/from the time switch or start Obelisk program.
- Memory card OBELISK top2 (No. 9070404) after Programming etc. remove and store in cover.

Avoid mechanical overload or contamination caused by other storage/transport.

GB

## RESET

- Press the 4 buttons simultaneously.

You can choose between **KEEP PROGRAM** and **DELETE PROGRAM**.

## Technical data

- Nominal voltage: 230–240 V~, +10 %/-15 %
- Frequency: 50-60 Hz
- Power consumption: typ. 8 VA
- Switching output: switching of choice of phase is permitted
- Contact: suitable for for switching smallest loads and SELV
- Type of contact: contact  $\mu$
- Contact material: AgNi 90/10-htv
- Switching capacity max.: 16 A, 250 V~,  $\cos \varphi = 1$ ;  
2 A, 250 V~,  $\cos \varphi = 0.6$
- Switching capacity min.: < 1 mA/< 1 V
- Shortest switching time: 1 minute
- Accuracy:  $\leq \pm 0,25$  s/day at +25 °C
- Power reserve: 10 years at 20 °C
- Permissible ambient temperature: -30 °C ... +55 °C
- Protection class: II in accordance with EN 60730-1  
for designated installation
- Protection rating: IP 20 in accordance with EN 60529

- Pollution degree: 2
- Rated impulse withstand voltage: 4 kV
- Software class: A
