Training case KNX

Item no.: 9070277

KNX
System devices and sets

Description

- KNX training case with various KNX products for training or practice purposes
- Contains 12 KNX products that can be commissioned and parameterised for training purposes
- The actions of the products are realistically displayed via lights and LED panels on a building floor plan
- Clear structure of all components, easy introduction to the topic of KNX
- A license for the ETS software is required for KNX programming; this is not included with the kit and can be purchased at https://my.knx.org
